

Quality Solution For All Growers . . . .

# A35 Seed-Air-Matic

From *K W Automation*

A vacuum is applied to an array of interchangeable needles to accurately pickup and deposit seed in each individual cell.

Seeding directly into punnets or plug trays singly or in multiples may be achieved by replacing single needles with multiple needles (up to 4 per cell).

Excess seed is collected via a vacuum tube and deposited in a removable jar, allowing quick and easy change-over of seed varieties.

A height adjustable seeding head caters for both plug trays and bedding plant flats.

## Automated Seeding

- ▶ **Quickly** - and easily change seed types, tray configuration and different size needles.
- ▶ **Seeds** - up to one row/sec with any plug tray.
- ▶ **Onboard**- dibbler designed to advance the tray while at the same time dibbling.
- ▶ **High Pressure**- push button needle cleaning.
- ▶ **Durable** - all aluminium construction.
- ▶ **Accurate** - singulation even with difficult seed.
- ▶ **Sow** - seeds of all shapes and sizes (incl. Petunia, Marigold & Pepper).
- ▶ **Optional** - compressor to operate machine.

A35 Seed-Air-Matic	Specifications
Production Speed	1 Row/Sec
Length	1.200 Metres (3'9")
Width	.750 Metres (2'6")
Height	.500 Metres (1'8")
Air Pressure Reqd	80PSI / 550KPA
Air Volume Reqd	10 CFM(free air delivery)
Suggested Min. Compressor Size	15 CFM
Max. Length Between Cell Centres	70mm/2.75"
Max. Tray Width	400mm/15.75"
Max. Tray Depth	175mm/7"
No. Trays/Hour	- 90 (LM512)
	- 120(LM288)

Optional: - Levelling Brush Unit  
- Specialty Needles
