

Quality Solution For All Growers . . . . .

# SG-1 Manual Seeder

From ***KW Automation***

QUICK & EASY SEEDING

Are you fed up and going cross-eyed with seeding each cell by hand, one seed at a time?

KW can now solve your seeding problem and save you time with the latest design in Manual Seeders.

The fantastic SG-1 Manual Seeder is ideal for the specialist grower or the grower just starting out.

Easy to operate, you simply connect it to your compressor, sit it on your work bench and away you go.

While pushing the handle down, the hand seeder is dibbling and at the same time picking up seeds to sow. You then rotate the dibble/seeder bar 90 degrees and a small lever cuts the vacuum suction allowing the seeds to drop into the dibbled hole in the tray.

Each seeder includes 6 sets of 20 needles of your choice and size.

- ▶ The SG1 Manual Seeder is easy to operate and quick to connect.
- ▶ Change over of trays made simple with an adjustable platform.
- ▶ Seeder bar is detachable for quick change over when seeding different trays.
- ▶ Adjustable dibbler bar.
