

Quality Solution For All Growers

TP2000 Transplanter

From *KW Automation*

- ▶ **Gentle** - pickup and Transplanting of your seedlings.
- ▶ **Catering**- for most styles and sizes of plug trays.
- ▶ **Easily** - operated with user friendly control screen.
- ▶ **Durable** - aluminium construction.
- ▶ **Speedy** - change-over to new tray/punnet styles.
- ▶ **Accurate** - conveyors give accurate plug placement.

The recent latest release of the TP2000 Transplanter into the Australian Nursery Industry has seen three machines installed in Australia in the first six months of the new millennium.

With the introduction of new pickup heads and new electric servo drive, the TP2000 is more accurate, gentle on plugs, faster and smoother than ever before.

Plug trays are automatically fed into the **TP2000 Transplanter**. Once the plug tray is in position the unique needle head lowers to hold the tray in place while at the same time gently pushing foliage to one side, thus minimising seedling damage.

The Transplanters' onboard Plug Popper ensures seedlings are cleanly dislodged from their cell before being picked up by the pickup needles and replanted into pre-dibbled trays/punnets.

The **TP2000 Transplanter** is designed to be compatible with all KW Automation machines on a fully automated transplanting line.

Could you do without the TP2000 Transplanter?

Specifications

Power Supply Reqd (415V)	25A/PH .30' (peak)
Length with Dibbler	5.490 Metres
Length without Dibbler	3.075 Metres
Width	2.200 Metres
Height	2.100 Metres
Plants/Hour	Up To 17,500 *
Air Pressure Reqd **	550KPA
Air Volume Reqd **	10CFM

* Based on 512 tray ** Compressor not included. Free air delivery required
