

KW Automation

Are your Sizer problems getting on top of you?

Fit a TASC Sizer Control System to your existing **electronic** or **mechanical** sizer and make your life a lot easier. Talk to us about the best solution for you, whether it's mid season, an emergency, or it's just time to finally get things sorted.

Improve your packing operation with a system that will allow you to....

- **Increase your flexibility** – put the fruit where you want it. Make changes instantly with the user friendly operator interface or optional Windows control software.
- **Take the worry away** – dramatically reduce downtime with a reliable system. Identify problems easily, even ones that have dogged you for years. Our system comes with a 2 year warranty and have a simple swap and go servicability. All KW mechanical weight sizers retain the mechanical weighing system for stress free backup.
- **Lower costs** – reduce the stoppages required for maintenance and setup. A new Tasc system will often pay for itself in just one season.
- **Save time** – for mechanical sizers cut changeover time. Calibrate just once a season. Increase production speeds!
- **Increase your accuracy** – maintain box weights for greater profitability and less repacking.
- **Quick installation** – Installation time can be as fast as 1 day for existing electronic graders and only 3 days for mechanical circular or inline systems.
