

Quality Solution For All Growers

Vermiculite Dispenser

From ***KW Automation***

Improve Your Germination Rate
By Covering Your Seeds Evenly.

- ▶ Suits most trays with only minor adjustments.
- ▶ Robust aluminium & steel construction.
- ▶ Low price means quick payback.
- ▶ Increase seeding productivity by over 20%.

HOW IT WORKS

This innovative design works with a small multi belt conveyor driven by an electric motor to drive either seedling or plug trays under the hopper.

The dispenser vibrates the vermiculite over the tray giving an even spread, which is easily adjustable for a heavier or lighter coat.
